Q11 What areas or aspects of your teacher education program do you feel assisted you the most in developing your skills and competencies to support student learning? (list up to three)

Answered: 19 Skipped: 13

#	Responses	Date
1	Through many reflections I felt that I saw a variety of class settings and environments that helped me to develop my skills.	11/3/2016 11:41 PM
2	- teaching strategies - understanding the standards and how to create lessons around them. - understanding of assessment -observations - student teaching: really helped with learning how to manage your time and to understand the realistic work load you'll be facing as a teacher. - cultural diversity	11/3/2016 12:38 PM
3	Assessment Strategies Projects Reading Intervention	11/3/2016 7:25 AM
4	- Classroom Management - Diversity in Education - Assessment	11/3/2016 7:17 AM
5	The only class that mattered directly to me was the English Methods course.	11/2/2016 2:29 PM
6	I think having experience with the Eureka Math program definitely helped with my career now. Hands on projects also helped. Real stories from real previous teachers also helped me to imagine what it would be like in my own classroom one day.	11/2/2016 1:54 PM
7	By working with and watching an experience educator instruct and properly handle discipline issues.	11/2/2016 11:45 AM
8	My psychology courses greatly helped me to understand students and be able to communicate with them to ensure I am presenting materials that relate to their understanding and interests. Most importantly the professors showed exemplary examples of what I thought an effective teacher should be like. They taught by example and this was my greatest tool that I took away from this program.	11/2/2016 8:28 AM
9	Real life stories from professors and student teaching with a great cooperating teacher.	11/2/2016 7:27 AM
10	1. Most of the professors and teachers were very realistic in preparing us for "real" teaching and not just the ideal teaching world you read about in textbooks. 2. The university provided many hands on experiences that I found to be the most meaningful learning	11/2/2016 7:09 AM
11	Student Teaching....Being in a real classroom with realistic behaviors!	11/1/2016 7:54 PM

SURVEY OF GRADUATES: College of Education Undergraduate Programs (October 2016)

12	Student teaching	11/1/2016 7:50 PM
13	Student Teaching, Math practicum, classroom management	11/1/2016 7:03 PM
14	Above all, my Diversity class prepared me the best for the particular teaching job I have. (Taught by Dr. Dana Stachowiak) Classroom Management was also very helpful.	11/1/2016 6:41 PM
15	One on one work. Student teaching. Management classes.	11/1/2016 4:12 PM
16	Student Teaching Group Projects Collaboration with Teachers	11/1/2016 4:07 PM
17	Assessment making Teaching strategies English Methods	11/1/2016 2:52 PM
18	Classroom management and READ 310. I learned the most from Lucy Begnaud	11/1/2016 1:59 PM
19	I can plan, teach and manage my classroom	11/1/2016 1:49 PM

Q12 What areas or aspects of your teacher education program do you feel assisted you the least in developing your skills and competencies to support student learning? (list up to three)

Answered: 18 Skipped: 14

#	Responses	Date
1	Real-life applications	11/3/2016 11:41 PM
2	- classroom management: so much time wasted scripting out an entire unit plan when in actuality what I really needed was tangible procedures and ideas for managing my classroom by someone who has actually been in a classroom in the last 10 years. Not that the unit plan wasn't helpful in understanding how much thought had to go into a week of lessons but realistically I will never spend that much time actually documenting every tiny detail that goes into a lesson. - technology class: Almost all schools have smart boards or Promethean boards which I find that their software is already not very intuitive so I wish we spent more time really learning how to use it properly. Also, I have yet to see a mac computer in any of my schools so I think learning on them is counterproductive.	11/3/2016 12:38 PM
3	I was not educated on: How to handle behavior problems, how to evaluate students for IAPs and IEPs, or how to motivate students.	11/3/2016 7:25 AM
4	n/a	11/3/2016 7:17 AM
5	The Field Experiences.	11/2/2016 2:29 PM
6	The ability to modify lessons and instruct students that have been classified as 504 and Sped.	11/2/2016 11:45 AM
7	Student teaching only one semester. I student taught under only one teacher giving me a lack of variety for teaching methods.	11/2/2016 8:28 AM
8	Observation hours early on (I wasn't looking for things I should have been looking for)	11/2/2016 7:27 AM
9	1. Countless hours of observations so early into the program (before entering block). At that time, I really didn't know what I was looking for and found them to be pointless hours.	11/2/2016 7:09 AM
10	Classroom Management, Behaviors	11/1/2016 7:54 PM
11	RTI instruction	11/1/2016 7:50 PM
12	Technology, diversity, diagnostic testing	11/1/2016 7:03 PM
13	The Assessment class was not helpful- I have not used the information that I learned in this class because the assessments that I give must be aligned to the type of assessments the students will take at the end of the year (LEAP format) Although the HEALTH class could be beneficiary because I can use the information in science lessons, but I do not feel as though the KNES class was necessary because there is no time in which I much design lessons to teach students these skills.	11/1/2016 6:41 PM
14	Music and art education classes.	11/1/2016 4:12 PM
15	Written Paper Assignments	11/1/2016 4:07 PM
16	Classroom management Using technology SPED classes (I came in knowing nothing about SPED/504)	11/1/2016 2:52 PM
17	MUSIC 306	11/1/2016 1:59 PM
18	How to handle difficult situations. How to communicate professionally.	11/1/2016 1:49 PM

Q13 What are some ways the current teacher education program could be improved to better prepare candidates to support student learning? Please provide an explanation.

Answered: 20 Skipped: 12

#	Responses	Date
1	Prospective teachers should be more hands on during their courses and should participate in a full year of a classroom's school year. This would help them to observe and have a hand in setting up classroom procedures and such.	11/3/2016 11:41 PM

SURVEY OF GRADUATES: College of Education Undergraduate Programs (October 2016)

2	I think the best thing to prepare teachers is actual time spent in a real classroom with lots of different teaching styles present. I know the new program is going to require a years worth of student teaching. While I feel like that will adequately prepare them for teaching I feel lucky that I did not have to do that. I had to quit my job half way through while student teaching because my cooperating teacher pretty much let me run the show for the majority of the semester. It was a full time job for me, having to create all my own lessons on a subject I was barely knowledgeable in (criminal justice), grade papers etc. I am glad I got that learning experience but it was incredibly overwhelming, financially straining and I fear the education department will cause their college students to burn out before they ever get to actually teach in their own class. I think providing a mentor (a true veteran mentor) could be helpful or encouraging collaboration between student teachers. Teaching can be really draining and a negative place sometimes. A positive environment or positive interaction with other student teachers/teachers could be beneficial.	11/3/2016 12:38 PM
3	Candidates need to be better prepared on how to handle students from diverse backgrounds. Many students come from homes that are low income and in poverty. These students do not know how to act in a social environment. I entered my first classroom not knowing how to respond to culturally diverse students. Candidates need support on how to respond to these students.	11/3/2016 7:25 AM
4	Provide real-world situations that teachers are expected to handle for classroom management. For example: high school students cursing at teachers or throwing a "temper tantrum" and breaking things in the classroom. There was no training on how to properly handle these types of situations.	11/3/2016 7:17 AM
5	HAVE MORE TEACHERS GIVE TALKS IN EDCI Classes	11/2/2016 2:29 PM
6	I think cooperating teachers should be screened more thoroughly- we want new teachers to be learning from the BEST! That way we learn truly effective strategies that we can take with us into our future classrooms.	11/2/2016 1:54 PM
7	Allow education students to prepare a lesson for students with special modifications/needs.	11/2/2016 11:45 AM
8	I believe that an entire school year of student teaching would benefit candidates greatly, allowing them to experience the entire start to finish process of creating, instilling, and continuing throughout the year significant routines, procedures, and planning that are crucial to a new teacher's success in the classroom.	11/2/2016 8:28 AM
9	Classroom management class should be provided later on in the program.	11/2/2016 7:27 AM
10	Extending the time in which you are a student intern. I think that if students were allowed to do a year of interning, it would better prepare them for being in the classroom. As an intern, you have to actually deal with real classroom situations and you learn so much more than you ever could out of a book.	11/2/2016 7:09 AM
11	More on Classroom Management. Longer requirements for student teaching. I think beginning student teaching in the Fall, within the first few days of school starting. Incoming teachers can actually see what goes on during the first few weeks of school. Also, better teacher mentors that actually work with interns. More structured agenda of task to review with interns.	11/1/2016 7:54 PM
12	Teacher candidates should spend full days in classrooms prior to student teaching to get a feel for a full day in the classroom. Students need to be better prepared to deal with the varying behavioral and academic situations we are encountering in the schools.	11/1/2016 7:50 PM
13	More field experience, required substitute time (other than student teaching), behavior management	11/1/2016 7:03 PM
14	I think that the program could be improved by beginning to teach the writing of lesson plans earlier on. After the college students learn the specific work and planning that goes into writing a detailed lesson with a specific learning target that is aligned to a standard, the professors should begin scaffolding so that by the end of the program, students are writing lesson plans that are more of their own design, rather than adhering to such a STRUCTURED design created by the professor. My experience writing lesson plans for the education program did teach me a lot about the thought processes involved in writing lessons (beginning with the end in mind, accommodating diverse learners, etc.) but I feel as though many professors were more focused on the layout or organization of the lesson plan, and less focused on its content. Also, since there was such a high expectation of the format in which the lesson plan was to be written, THAT was the lesson I learned. I have realized that this is unrealistic because in each school, the format of the lesson plan that is expected will vary. I have learned that it is the CONTENT of the lesson plan that our principals and districts value. Also, because of my experience teaching at a school that follows the TAP evaluation rubric, I think that more time should be spent teaching our future teachers about best practices. So much time was spent learning content (which is of the GREATEST importance) and writing lesson plans (which also has INCREDIBLE value), but as a teacher whose job relies on using these NIET best practices, I wish I had been better prepared. Luckily, in my school, we have an amazing master teacher who provides 70 minutes of professional development each week. We pick apart the rubric and are assigned "homework" in which we apply one part of the rubric into our weekly lessons. We are given time to reflect on our application and then talk about it in our meeting the following week. This has been EXTRAORDINARILY beneficial to my progress and growth as a teacher and I think that if this could somehow be implemented in the education program at UL, our future teachers would be one step ahead.	11/1/2016 6:41 PM
15	More management classes.	11/1/2016 4:12 PM
16	The teacher education programs needs to allow teacher candidates more time in the classroom. I feel I got the most out of my student teaching experience when I was actually in the classroom working with other teachers and teaching the students.	11/1/2016 4:07 PM
17	I believe there needs to be more interaction with students earlier. I also think that professors need to share more real life teaching examples/stories and how they handled them. I'm not sure how to teach someone classroom management/contacting parents without putting them in a classroom, but there needs to be an improvement in preparation for those areas too. Teaching is so much more than "in the classroom". Sometimes your outside responsibilities (clubs, meetings, PLCs, paperwork...) are more stressful than the simple teaching part.	11/1/2016 2:52 PM
18	Before having my own classroom I never even looked in a teachers manual. I only knew how to write 2+ page long lesson plans which is not realistic. I wish we would have used manuals to write lesson plans similar to ones that we use online in classrooms today.	11/1/2016 1:59 PM
19	Longer student teaching, more hands on experience	11/1/2016 1:54 PM
20	Give real life experiences and how they handled them. More hands on with students who are harder to handle. Ex inner city kids.	11/1/2016 1:49 PM

Q14 Do you feel you were prepared to teach the subject(s) you presently teach? Please provide an explanation.

Answered: 20 Skipped: 12

#	Responses	Date
1	I feel prepared to teach my subjects partially from my learning and partially from great cooperating teachers.	11/3/2016 11:41 PM

SURVEY OF GRADUATES: College of Education Undergraduate Programs (October 2016)

2	Overall, yes.I was a little bit older when I graduated and had a pretty good understanding of the work load I would be facing. My only issues have been work life balance. I started to feel pretty overwhelmed and even depressed at the beginning of my second year teaching. I've had to really work on finding a healthy balance and accepting that not everyday is going to go perfectly.	11/3/2016 12:38 PM
3	I was taught every content subject that I teach. I believe that I learned more through my first year of experience. The methods taught in college are not necessarily the methods that will be used within your school or district.	11/3/2016 7:25 AM
4	Yes. I feel that if you are a good teacher, you can teach just about any subject. My degree is in social studies education but I am applying that knowledge to an English course.	11/3/2016 7:17 AM
5	Yes	11/2/2016 2:29 PM
6	I do feel prepared to teach math thanks to the experience I already had using the current curriculum throughout my college career.	11/2/2016 1:54 PM
7	Yes, because of my continued education.	11/2/2016 11:45 AM
8	Yes, even though I am certified in elementary and early childhood education, the program and courses taken tremendously helped me to scaffold my educational knowledge across the grade levels I now teach.	11/2/2016 8:28 AM
9	Yes	11/2/2016 7:27 AM
10	Yes, I feel that my experiences with the university prepared my to teach all of the content that I cover in my classroom.	11/2/2016 7:09 AM
11	I was prepared to teach science. However, I could of used more classes that focused on lesson planning, more collaboration, more hands-on.	11/1/2016 7:54 PM
12	yes	11/1/2016 7:50 PM
13	No. I was not prepared for the reality of teaching. Balancing life and work along with meeting expectations. I don't know if you can prepare any9ne for it.	11/1/2016 7:03 PM
14	Not wholly, but I only say this because my school uses the ELA Engage New York Curriculum and I was taught nothing about it during my college career. I have been able to use some of what I learned in my ELA/READ courses to supplement the curriculum, but I felt as though most of what I learned was not useful towards what I was required to teach.	11/1/2016 6:41 PM
15	No. not in the management area. I believe we should be a part of more management courses.	11/1/2016 4:12 PM
16	Yes. I had a great Reading/English background, which has prepared me to teach ELA. I worked with small groups through my Reading college class. I have tried to incorporate projects and activities I learned in college with my current class because I feel they were so beneficial to the students' learning.	11/1/2016 4:07 PM
17	I was prepared to teach English because ELA skills come naturally to me.	11/1/2016 2:52 PM
18	Yes. I personally feel as though I struggle most with differentiation. We talked about it, but it was all theory. Stepping into a classroom and actually having a class is when the problems arise so I feel as though UL did as good as they could without us having our own classroom.	11/1/2016 1:59 PM
19	I feel that there is a lot that you are not prepared for unless you spend lots of time in the classroom before you graduate	11/1/2016 1:54 PM
20	Absolutely.	11/1/2016 1:49 PM

Q15 Please note any additional questions, comments or concerns here.

1	Being a teacher is not easy so I am conserved when I hear, "well I don't know what I want to do so I'll be a teacher." Prospective educators need to do hands on work early in their learning so that they can decide is this is truly the career path for them.	11/3/2016 11:41 PM
2	NA	11/3/2016 7:25 AM
3	I think training with current software programs in the education systems would be very useful (Oncourse, Webpams, Aimsweb etc)	11/2/2016 1:54 PM
4	Overall. Behavior is my main issue. Interns should spend as much time in the classroom, observing and teaching full lesson. When I student taught, I was expected to teach, prepare lessons and monitor behavior the entire time of student teaching. This was a lot of work for an intern but it taught me to be strong.	11/1/2016 7:54 PM
