Teaching Philosophy	My philosophy of teaching is to assist young men and women to learn to think for themselves, become excited about learning, and work to improve their world. Although my technique or methodology of teaching has transitioned to online teaching, I still interact continually with students and believe that it is most important for students to know that I am always there for them.
Bio	Dr. Susan A Lyman is a Professor in the School of Kinesiology (KNES) at The University of Louisiana at Lafayette. She previously (2013-2020) held the Vesta Bourgeois Professorship in Health and Physical Education. Susan participated in all the requirements that come to mind when one wonders about the responsibilities of a professor at a university. She has presented at national, regional, and state conferences; published in national and state journals; written, received, and evaluated numerous grants; served on numerous university level, college level, department level committees; and participated in community service; and raised three children during this time. Susan was largely accountable for developing and implementing the Health Promotion and Wellness program into an online program, and has designed many online courses in the program. But, the most enjoyable and important aspect of her thirty years at UL Lafayette has been teaching and interacting with incredible students.
